

XM radio is a great service that is dependable and uaseful AS IS. We buy it because we want it AS IS. Traffic and weather on satellite radio makes perfect sense. During most severe weather events, local radio is impossible to listen to because of static from lightning, etc. We want XM radio to stay as it is. Please do not ruin the format by giving in to special interest pressure groups. I respectfully ask the FCC to reject the NAB petition 04-160. Thank you.
